

OMNIPOD DASH PUMP UPGRADE

In order to be prepared for training, please take the time to do the following to ensure that together we can optimize your learning experience:

1. Open your box(s) and take everything out.
2. Insert the battery in your PDM and ensure it is fully charged **before** your appointment.
3. Click on the following link to view the Omnipod Dash training videos:
https://www.omnipod.com/en-ca/DASH_video
4. Program your name, time and date into the PDM, practice button pushing and familiarize yourself with the menu options.

Please upload your current pump so your pump trainer may access your current settings.

In preparation for your training on your new pump, these are the settings you will need from the pump you are currently using:

Insulin: carbohydrate ratios (ICR)
Insulin sensitivity or correction factor (ISF)
Basal programs
Basal rates
BG Targets
Active Insulin time (Insulin action)
Low reservoir
Max basal
Max bolus
Auto off (Auto suspend)

Call Omnipod Technical Support at 1-855-763-4636 (press 3) if you have any questions before your training date.
