

Please note the following supplies are required for your upcoming **HUMALOG U200 START** in your insulin pump.

1. Humalog U200 insulin - you **MUST** bring the insulin to your appointment. Humalog U200 insulin **ONLY** comes in a prefilled pen. If you have trouble obtaining it from your pharmacy, please contact your diabetes educator.
2. One infusion set: infusion site, tubing and cartridge/reservoir or 2 pods. In order to switch to U200 in your pump, during the appointment you **will** change your pump site or pod.

*For Omnipod 5: bring an additional Dexcom sensor. A factory reset is required, and the sensor may not reconnect to your controller. Ensure you have your Omnipod ID and password, this is required to do a factory reset.

*For mylife Loop YpsoPump: bring a Dexcom OR Libre 3 sensor. You will create a new account and you may need to start a new sensor.
